

How would you **OBTAIN RINGS?**

Like all wizards, Vorpax seeks to collect the nine rings of power! Heck, he wants nine of *each*! But these rings are precious — precious, I tell you! They have considerable *ring value*, you see. Solve the word sudoku below, noting that each row, column, and 3x3 section must contain one each of all the letters in **RING VALUE**. Then check the letters on the main diagonal for your trait.

Trait: _____

8			I			E		
A	1		G			N		V
V		7		N	A			G
	E	A	6		U			R
L			A	4	G			U
G			R		2	L	A	
U			N	V		5		L
R		L			E		9	I
		V			R			3
